

1 [Resolution on Policy and Program Recommendations for Community Choice Aggregation
2 Implementation Plan]

3

4 **Resolution submitting Policy and Program Recommendations for a Community Choice**
5 **Aggregation (CCA) Implementation Plan.**

6

7

8 WHEREAS, The primary purpose of the San Francisco Local Agency Formation
9 Commission (San Francisco LAFCo or Commission)¹ under the Cortese-Knox-
10 Hertzberg Local Government Reorganization Act of 2000 is to review public service
11 needs, including utility service, and to determine whether new government entities
12 should be created or changes in existing governments should be made to address the
13 needs of its citizens; and

13

14 WHEREAS, The Commission adopted by resolution its Energy Services Study
15 and Recommendations for Electric Utility Service, and recommended that the
16 Commission pursue the feasibility of implementing the provisions of AB 117 (Chapter
17 838, Statutes of 2002) by the City and County of San Francisco (CCSF); and

17

18 WHEREAS, The Board of Supervisors subsequently adopted on May 11, 2004,
19 an Ordinance No. 00-86-04 establishing a Community Choice Aggregation Program in
20 accordance with Public Utilities Code Sections 218.3, 331.1, 366, 366.2, 381.1, 394 and
21 394.25 to further the implementation of a program to purchase electrical power directly
22 for the citizens of the City and County of San Francisco and to accelerate renewable
23 energy, conservation and energy efficiency programs; and

23

24

25

¹ Attached hereto as Exhibit A is a Glossary of Terms.

1 WHEREAS, The Ordinance No. 00-86-04 required that the San Francisco Public
2 Utilities Commission (SFPUC) and the San Francisco Department of the Environment
3 jointly prepare and submit to the Commission for review and comment an
4 Implementation Plan (SFPUC/SFE IP) which was submitted on April 27, 2005. In
5 addition a draft IP was submitted by Local Power (LP Draft IP); and

6 WHEREAS, The San Francisco Local Agency Formation Commission (Commission)
7 held hearings regarding the two draft IP's and attempted to resolve the differences between
8 the two on the following dates: February 4, March 11, April 15, April 22, May 13, June 10,
9 June 17, July 8, July 14, July, and August 4, 2005; and

10 WHEREAS, The San Francisco Local Agency Formation Commission hereby
11 recommends the following policy directions and program designs and; now therefore be
12 it

13 RESOLVED, That the San Francisco Local Agency Formation Commission
14 adopts and transmits to the Board of Supervisors for the City and County of San
15 Francisco this Resolution for Policy directions and Program Designs for inclusion in the
16 Community Choice Aggregation Implementation Plan:

17 **Policy Criteria and Program Design Recommendations**

18
19 **1. SCOPE/ORGANIZATIONAL STRUCTURE AND FUNCTIONAL RESPONSIBILITIES.**

20 Chapter 7 and Appendix A of the SFPUC/SFE Draft IP and Chapter II and V of the LP
21 IP describe options for the organizational structure of the CCA. According to recent
22 advice from the City Attorney, the SFPUC has exclusive jurisdiction over the
23 implementation of the CCA with oversight from the Board of Supervisors and the means
24 to change this exclusive jurisdiction would be through a Charter amendment. The
25 Commission is intending to retain independent legal counsel to provide additional

1 advice. The Commission also believes that a joint powers authority may be appropriate
2 for CCA implementation. The Commission makes the following recommendations:

3 **Program Policy**

- 4 • **Electric service is an essential service.**
- 5 • **Citizens deserve the government accountability that City staffing provides.**
- 6 • **CCA program is a CCSF commitment to provide retail power services.**
- 7 • **CCA program should offer service to all non-municipal customers in the City and**
8 **County of San Francisco.** California law requires the CCA program to offer all
9 residential customers service; CCA program economics makes it more cost-effective if
10 other classes of customer are also offered service.

11 **Program Design**

- 12 • **SFPUC/SFE Draft IP estimates that 28 city employees will staff the most**
13 **important public interface functions of the CCA program. These functions**
14 **are:**
 - 15 • call center functions – Appendix A of the SFPUC/SFE Draft IP identified 13 full time
16 employees in a steady-state and potentially more (which could be temporary hires)
17 during the mass enrollment process;
 - 18 • opt-out supervision and oversight – the notification and opt-out process will involve
19 the vast majority of electric customers within the city. Although the energy service
20 supplier should be directly responsible for the day-day operation of the opt-out
21 function it is vital that this major undertaking occur with the real-time
22 supervision/cooperation of city employees, particularly to help coordinate and deal
23 with problems which are likely to occur. Public communication and out-reach
24 should start considerably before the mass notification/opt-out process for CCA
25 program.

- 1 • regulatory oversight and oversight/negotiation of the RFP process for an energy
2 service supplier.
- 3 • **The wholesale supplier to the CCA program undertakes and staffs the remaining**
4 **functions**
- 5 • **City staff is assumed to manage any CCA program energy efficiency efforts for**
6 **reasons described in Chapter 7 of the SFPUC/SFE Draft IP.** However, initially there
7 is no specific staffing set aside for energy efficiency. The City should continue to
8 pursue administration/management of the PGC funds paid by San Francisco electric
9 ratepayers as a source of funding for this effort.

10 2. ORGANIZATIONAL STRUCTURE RECOMMENDATIONS

11 Program Policy

- 12
- 13 • **The City needs to act quickly.** The City needs to establish the CCA program with
14 some urgency to mitigate the risk of its citizenry being allocated additional Cost
15 Responsibility Charges by the California Public Utilities Commission (CPUC).

16 Program Design

- 17 • **The SFPUC should be tasked, staffed and funded to implement the CCA**
18 **program.**
- 19 • **SFE should be tasked, staffed and funded, via Work Order and PGC funds if**
20 **available to assist the SFPUC by undertaking the energy efficiency aspect of the**
21 **CCA program.** SFE staff has current responsibility for providing certain energy
22 efficiency services and residential solar services to CCSF PG&E customers.
- 23 • **The City Attorney's Office should be tasked, staffed and funded to provide legal**
24 **services to the CCA program.**

- 1 • A Board approved Program Director’s position will be created and/or designated
2 to implement the program.

3 **Governance and Oversight of the Staff Function Recommendations**

4
5 **Program Policy**

- 6 • The Board of Supervisors will have oversight responsibilities over the CCA and
7 the SFPUC implementation of the IP. This oversight includes approving the
8 budget of the CCA, rate setting, bond financing, the IP, and authorization to
9 award any electric supply contract. A Rate setting advisory board such as a new
10 Electricity Rate Fairness Board or potentially the existing Rate Fairness Board for water
11 and sewer rates should be tasked to handle complaint or citizen input.
- 12 • Assigned staff should be directly accountable to the governing and oversight
13 body, the CCSF.

14 **Program Design**

- 15 • **City Rate setting Mechanisms and Costs to Participants**
- 16 1) Chapter 3 of the SFPUC/SFE Draft IP and Chapter II and V of the LP Draft IP
17 describe in some detail the different contexts in which energy rate setting will be
18 accomplished. The most crucial aspect of rate setting is the fundamental
19 consumer protection inherent in a public process to establish and change
20 electric rates.

21 **A. DRAFT RATESETTING RECOMMENDATION**

22 **Program Policy**

- 23
24 • The City should meet or beat the level of due process in rate setting currently
25 provided under the PG&E/CPUC structure.

- 1 • **CCA program staff and governance body should work from a common**
2 **information base.** It is necessary to have an information and coordination linkage
3 between the staff working directly on the CCA program and any formal governance of
4 rate setting.
- 5 • **The City has ready models for rate setting governance upon which it should**
6 **build.**

7 **Program Design**

- 8 • A rate setting advisory board such as a new Electricity Rate Fairness Board or
9 potentially the existing Rate Fairness Board for water and sewer rates should be
10 tasked to handle complaint or citizen input.

11 **3. BENEFITS OF THE PROGRAM TO SF CUSTOMERS**

12 Chapter 4 of the SFPUC/SFE Draft IP and Chapter II and V of the LP Draft IP set forth the
13 benefits, costs, risks and opportunities available to the City if it chooses to implement a
14 CCA. The Commission concurs that the CCA program is of benefit and makes the
15 following recommendations.
16

17 **RECOMMENDATIONS ON PROGRAM BENEFITS**

18 **Program Policy**

- 19 • **CCSF should pursue CCA if it is reasonable to expect that CCSF can achieve the**
20 **program goals articulated in Ordinance No. 00-86-04 – clean, reasonably priced,**
21 **and reliable electric service.**
- 22 • **CCSF should identify “off ramps” for program development in the event it**
23 **becomes unreasonable to expect we can achieve our goals.**
24
25

1 **Program Design**

- 2 • **SFPUC will evaluate the CPUC rules as they are announced and will report**
- 3 **significantly negative impacts on program design.** CPUC is: 1) resetting the Cost
- 4 Responsibility Surcharge; 2) presently considering the costs PG&E will be allowed to
- 5 charge CCAs for related services, (such as customer billing); and 3) establishing the
- 6 level of commitment a City must demonstrate for the utility to no longer procure for City
- 7 customers. Decisions on topics like these impact program costs and allocation of risk
- 8 between PG&E and CCSF, which may in turn affect our ability to achieve our goals.
- 9 • **The Request for Proposal (RFP) will incorporate** the direction for program policy
- 10 and design endorsed by the Mayor and Board of Supervisors.
- 11 • **SFPUC will report on the extent and make up of customer opt-out.** Substantial
- 12 opt-out by larger CCSF electricity customers presents a substantial risk to the
- 13 economic success of the CCA.

14 **4. PROGRAMS ABILITY TO MEET OR EXCEED THE RENEWABLE PORTFOLIO**

15 **STANDARDS (RPS) REQUIRED OF PG&E BY THE CPUC.**

16 Chapters 4, 9, and 10 of the SFPUC/SFE Draft IP and Chapters 2, 3, and 5 of the LP Draft

17 IP address different aspects of CCA Renewable Portfolio Standard (RPS) issues. The

18 Commission heard significant testimony on this issue and makes the following

19 recommendations:

20

21 **RENEWABLE GENERATION RECOMMENDATIONS**

22 **Program Policy**

- 23 • **The CCSF CCA program should achieve the Electric Resource Plan (ERP) target**
- 24 **goals for increasing renewables.** Reliance on renewable generation is consistent
- 25

1 with San Francisco's community values and reduces the City's contribution to
2 greenhouse gas emissions. The CCSF shall retain discretion to allow design of a
3 program that reflects renewable generation as a percentage of customer load in the
4 event the RFP responses do not achieve all of the goals of the ERP (360MW of
5 renewable and distributed generation and energy efficiency reductions).

- 6 • **The pace for reaching the renewable target should be set in a manner that does**
7 **not increase customer rates.** While increasing our reliance on renewable generation
8 is an important policy objective, we must continue to maintain affordability of this
9 essential service for our citizens. CCSF needs to have a contingency plan in place in
10 the event the full 360MW target is not achievable. We need to also remove any roll out
11 barriers on new energy programs.
- 12 • **The CCA program should include investment in large-scale, cost-effective**
13 **renewable generation.** Direct investment in renewable generation increases the
14 City's energy independence.

15 Program Design

- 16 • **Retain discretion for how to meet or exceed PG&E's RPS requirements in an**
17 **Implementation Plan.** Set benchmarks for renewables that protect and defend the
18 policy of 360MW.
- 19 • **Encourage distributed renewable generation.** The City should plan on offering a
20 CCA net-metering tariff to encourage its customers to invest in renewable self-
21 generation. The City should continue to support expansion of state incentives for
22 distributed solar PV and other renewable technologies.
- 23 • **Use municipal bond financing authority to invest in large-scale wind or other**
24 **cost-effective renewable generation.** Chapter 5 of the SFPUC/SFE Draft IP and
25

1 Chapters 4, 5 and 7 of the LP Draft IP assume the use of Proposition H bonds for
2 financing of large-scale wind or other cost-effective renewable generation. The City
3 Attorney has opined that 1) Proposition H bonds may be used by the CCSF to fund
4 such projects; and 2) The taxable status and thereby cost consequences of such funds
5 will depend upon whether the project structure is based upon a lease or build to suit
6 with a private party arrangement.

7 **5. PROGRAMS ABILITY TO MEET OR EXCEED CONSUMER PROTECTION**
8 **STANDARDS REQUIRED BY PG&E OF THE CPUC.**

9 Chapter 7 of the SFPUC/SFE Draft IP and Chapter 5 of LP Draft IP discuss consumer
10 protection issues. After hearing, the Commission makes the following
11 recommendations:

12 **CONSUMER PROTECTION RECOMMENDATIONS**

13 **Program Policy**

- 14
- 15 • **The City should meet or beat the level of customer protection currently provided**
 - 16 **under the PG&E/CPUC structure.**
 - 17 • **The City should include a low income ratepayer assistance program in its CCA**
 - 18 **program.**
 - 19 • **The SFPUC may have exclusive jurisdiction over electric rates and if so they can**
 - 20 **use either a new Electricity Rate Fairness Board or the existing Rate Fairness**
 - 21 **Board for water and sewer rates as a rate-setting body.**

22 **Program Design**

- 23 • **The CCA program staff must be pro-active regarding the likely sources of**
- 24 **consumer complaints.**
- 25

- 1 • **CCA call center staff will be on the front lines of consumer complaint resolution.**

2 Call center staff training should incorporate consumer complaint issues. Consumer
3 complaints not adequately addressed by call center staff should be referred to the Rate
4 Fairness Board [or the chosen structure].

- 5 • **CCA program staff, working with the rate setting authority, will craft a rate
6 structure for low income customers comparable to the State-mandated program.**

7 In the event the Call center is unsatisfactory in answering questions regarding rates,
8 consumers may contact the Electricity Rate Fairness Board.

9 **6. CONTRACTING AND DISCLOSURE OF THIRD PARTIES THAT WILL BE
10 SUPPLYING ELECTRICITY OR PROVIDING OTHER SERVICES UNDER THE
11 PROGRAM, INCLUDING INFORMATION ABOUT FINANCIAL, TECHNICAL, AND
12 OPERATIONAL CAPABILITIES.**

13 Chapter 6 of the SFPUC/SFE Draft IP and Chapter 5 of LP Draft IP provide information
14 on the various contracting options available to a CCA as well as guidance regarding
15 maximization of RFP response. The Commission recommends:

16 **PROVIDER INFORMATION RECOMMENDATION**

17 **Program Policy**

- 18 • **CCA supplier selection should conform to city contracting policy.**
19 • **The CCA program should strive for transparency in the contracting process and
20 bid results disclosure.** The City bodies, e.g., SFPUC, SFE, SFPUC Citizen's
21 Advisory Committee, and CCA Task Force should be informed to ensure citizen
22 confidence in the process and in the resulting rate setting process.

- 1 • **The RFP should be structured in a manner that will provide needed information**
2 **about the winning bidder, upon selection.** Once the winning bidder is selected,
3 information about that bidder should be made available.
- 4 • **It may be advisable to have a Request for Information (RFI) or Request for**
5 **Qualification (RFQ) initially to determine the interest and variety of potential**
6 **bidders on an RFP. The Board of Supervisors shall have oversight and the CCA**
7 **Program Director should undertake a pre-qualification process and make**
8 **preliminary recommendations. The Board of Supervisors shall have final**
9 **authority to approve the final draft RFP pursuant to Ordinance No. 00-86-04.**

10 **Program Design**

- 11 • **As envisioned in Ordinance No. 00-86-04, SFPUC and SFE will prepare an RFP.**
12 The RFP will incorporate the direction for program policy and design endorsed by the
13 Mayor and Board of Supervisors. The Board of Supervisors will require technical
14 staffing from the SFPUC, SFE, and the Program Director. The Board of Supervisors
15 should approve the RFP, by resolution, before it is issued. The Electricity Rate
16 Fairness Board will also need staffing.
- 17 • **Upon selection, information about the winning bidder will be disseminated.**
18 Potential CCA customers will receive information about the selected provider of
19 services as part of the communications associated with program start-up, and on an
20 on-going basis in response to customer inquiries.
- 21 • **The RFP should request the Energy Service Supplier (ESP) to provide rates for**
22 **Direct Access customers with the goal of providing incentives for such**
23 **customers to join the CCA.** The rate setting body will oversee this process to
24 **ensure that any Direct Access rates be approved.**
25

- 1 • The RFP should reserve to CCSF establishment of actual electricity rates, based
2 upon total CCA program costs, to be charged to CCA customers, however, CCSF
3 will establish such rates based upon the rate structure recommended by the
4 bidder chosen by the RFP process.
- 5 • The RFP should include reservation for the Board to retain authority to
6 termination or withdrawal from the bid or bid negotiating process/ with the ESPs
7 should responses to the RFP jeopardize or negatively effect the CCSF program
8 goals.

9 7. INFORMATION ABOUT PROGRAM TERMINATION

10 Chapter 6 of the SFPUC/SFE Draft IP and Chapter 5 of the Local Power Draft IP
11 discuss program termination policies. The Commission makes the following
12 recommendations.

13 PROGRAM TERMINATION RECOMMENDATION

14 Program Policy

- 15 • **Program termination can be costly, should be understood upfront, and the**
16 **consequences mitigated through program design.** Termination could be
17 precipitated by events such as non-competitive CCA power prices, a natural disaster,
18 overall market failure, or failure of the provider should be evaluated and planned for.

19 Program Design

- 20 • **Incorporate SFPUC/SFE Draft IP Chapter 6, regarding all contractual termination**
21 **language (sections 2.7, 3.14, 3.15, and 3.17) into the CCA Implementation Plan to**
22 **be certified by the CPUC.** These sections describe the circumstances under which
23 termination could happen, and the credit and financial assurances, and contracting
24 provisions needed to mitigate program termination costs and disruptiveness.

25

1 **8. WHAT FUNCTIONS OF THE PROGRAM SHOULD BE PERFORMED BY OTHER**
2 **ENTITIES INCLUDING ELECTRIC SERVICE PROVIDERS**

3 Chapters 6 and 7 of the SFPUC/SFE Draft IP describe in some detail the functions
4 required for implementation and day-to-day operation of a CCA. The LP Draft IP relies
5 on an ESP to bear the risk of the CCA program. The Commission recommends the
6 following.

7 **PROVIDER FUNCTION RECOMMENDATION**

8 **Program Policy**

- 9
- 10 • **The City needs to act in a timely manner. It recognizes the program complexity**
11 **and technical sophistication that complexity requires, the scale economies**
12 **achieved, the experience needed, and the risk mitigation that contracting out for**
13 **certain functions provides.** All non-public face CCA functions should be undertaken
14 by other entities.
 - 15 • **There should be clear lines of responsibility and decision-making regarding both**
16 **CCA implementation and day-to-day CCA operation.** This argues for a single CCA
17 provider responsible for all CCA functions apart from those identified above as the
18 responsibility of the City staff.
 - 19 • **The RFP should invite proposals from qualified providers and not limit bidders to**
20 **the subset of qualified providers termed “Electric Service Providers”.** Other
21 entities could be other municipal utilities or other forms of public power providers.

22 **Program Design**

- 23 • **The RFP will give preference to a structure that identifies a single, accountable**
24 **provider for optimum coordination and integration of CCA implementation and**
25 **operation.**

- 1 • **SFPUC and SFE have expressed a desire to retain all energy efficiency programs**
- 2 **and functions.**
- 3 • **The RFP will identify the functions that will be performed by City staff and invite**
- 4 **all qualified providers to bid on the remaining functions necessary to provide**
- 5 **electric service.** Qualified providers will detail the functions they will provide and the
- 6 reporting relationship among the prime contractor and any subcontractors, and
- 7 between the prime contractor and City staff.

8 **9. CONTRACT AND BID REQUIREMENTS (ITEMS I – V)**

9 The Commission makes the following recommendations consistent with the

10 SFPUC/SFE Draft IP and the LP Draft IP:

11 **CONTRACT AND BID REQUIREMENTS RECOMMENDATIONS**

12

13 **Program Policy**

- 14 • **CCA supplier selection should conform to city contracting policy.**
- 15 • **The contract duration should be set to both preserve CCSF's full public power**
- 16 **option and ensure the provider a degree of contract stability.**
- 17 • This is a new program that is complex in nature and will provide an essential service to
- 18 San Franciscans. Contract and bid requirements should not add unduly to this
- 19 complexity.
- 20 • The CCSF shall retain discretion to allow design of a program that reflects renewable
- 21 generation as a percentage of customer load in the event the RFP responses do not
- 22 achieve all of the goals of the ERP (360MW of renewable and distributed generation
- 23 and energy efficiency reductions).
- 24 • **The pace for reaching the renewable target should be set in a manner that does**
- 25 **not increase customer rates.** While increasing our reliance on renewable generation

1 is an important policy objective, we must continue to maintain affordability of this
2 essential service for our citizens.

3 **Program Design**

- 4 • The Board of Supervisors should retain discretion to set the terms of the contract
5 balancing the considerations regarding risk, the City transactional process to sign any
6 new contract, City considerations regarding municipalization, and a degree of contract
7 stability for the wholesale supplier.
- 8 • **The RFP will give preference to a structure that identifies a single, accountable**
9 **provider.** One service provider for all CCA required services will help to integrate CCA
10 rate-setting, meeting renewable portfolio goals, and resource adequacy goals within
11 one portfolio. It will assure that only one provider has to coordinate with PG&E
12 regarding the day-day operation CCA functions.
- 13 • Bidder should specify how the pace of renewable energy development in their bid
14 implements the Electric Resource Plan targets while ensuring rates competitive with
15 PG&E's. Rates higher than PG&E's to fund renewable generation purchases in the
16 initial program years undermine program stability and success.
- 17 • **City staff is assumed to manage any CCA program energy efficiency efforts for**
18 **reasons described in Chapter 7 of the SFPUC/SFE Draft IP. In the event that**
19 **ESPs are unresponsive in the bidding process, the Board should retain ability to**
20 **direct City staff regarding energy efficiency, peak shaving and load management**
21 **goals in the best interest of the City, including providing 107MW of energy**
22 **efficiency and conservation measures required by Ordinance No. 00-86-04.**
- 23 • **The RFP should require any supplier to describe how it will meet the RPS goals**
24 **set forth for year 1 and year 2 of the contract.**

- 1 • **The RFP should require any supplier to enumerate the local economic benefits of**
2 **its response.** The proposal should make it clear how its bid affects the local economy,
3 e.g. establishment of an office in San Francisco, job creation in San Francisco, and any
4 other local economic benefits.
- 5 • The RFP should ask the ESP to provide rates for Direct Access customers with the
6 goal of providing incentives for such customers to join the CCA provided that the rate
7 setting body will oversee this process to ensure that any direct access rates be
8 approved.
- 9 • The RFP should include reservation for the Board to allow termination or withdrawal
10 from the bid/bid negotiating process/or contract with the designated ESP should
11 response to the RFP and/or CPUC developments (or other matters) jeopardize or
12 negatively effect the CCSF program goals.

13 **10. HOW PROP H BONDS MAY BE USED TO AUGMENT CCA.**

14 The City Attorney has opined that Proposition H bonds may be used for renewable
15 energy facilities, however, the taxable status and thereby cost consequences of such funds
16 will depend upon the use of those funds in determining whether the project structure is based
17 upon a lease or build to suit with a private party arrangement. Chapter 4 of the SFPUC/SFE
18 Draft IP has found that tax exempt H Bonds for renewable generation can meet both RPS
19 goals as well as cost effectiveness goals.

20 **DRAFT PROPOSITION H BOND APPLICATION TO CCA RECOMMENDATION**

21 **Program Policy**

- 22 • **Proposition H authority should be exercised to the fullest extent lawful and**
23 **consistent with the other CCA program policies.** Voters clearly articulated their
24
25

1 desire for increased energy efficiency and renewable generation investment through
2 the vehicle of revenue bonds. That vehicle should be utilized in the CCA program to
3 achieve the renewable generation targets and, as feasible, energy efficiency targets.

- 4 • **Legal and Financial questions raised in the SFPUC/SFE Draft IP are significant**
5 **and have been initially addressed by the City Attorney. The City Attorney has**
6 **opined that** Proposition H bonds may be used to fund new wind generation on a lease
7 purchase/build to suit basis with a private third party under contract with the CCSF.
8 Bonds may be tax exempt or taxable and the SFPUC and the Board of Supervisors will
9 need to address in the future the cost/benefits of the alternative bond structures.

10 **Program Design**

- 11 • **The Program Director and SFPUC will pursue the steps necessary to take**
12 **advantage of the Proposition H authority.** These steps are outlined in Chapter 5 of
13 the SFPUC/SFE Draft IP, and include obtaining a credit rating for the CCSF.
- 14 • **SFPUC will issue an RFQ/I to ascertain the renewable energy investment**
15 **opportunities available to the CCA.**

17 **11. WITH THE ASSISTANCE OF THE CITY ATTORNEY CONTINUE TO PARTICIPATE** 18 **IN CPUC PROCEEDINGS ON ADOPTING RULES FOR IMPLEMENTING COMMUNITY** 19 **CHOICE AGGREGATION AND OTHER RELEVANT PROCEEDINGS**

20 Chapter 9 of the SFPUC/SFE Draft IP provides details of the proceedings underway at
21 the CPUC and SFPUC and SFE staff participation in those proceedings. SFPUC staff, with
22 City Attorney support, should continue their advocacy efforts to shape program rules most
23 favorable to CCSF.

1 **12. COLLECT ELECTRIC LOAD DATA AS SPECIFIED IN THE ORDINANCE**

2 Chapter 2 of the SFPUC/SFE Draft IP provides considerable detail and analysis of the
3 load and customer data gathered and reviewed to date.

4 WHEREAS, The San Francisco Local Agency Formation Commission determines that
5 it is advisable for the Board of Supervisors to express its support for the Community Choice
6 Aggregation Implementation Plan; now therefore, be it

7 RESOLVED That the Board of Supervisors support the recommendations as outlined
8 in this Resolution and submit an Implementation Plan to the California Public Utilities
9 Commission (CPUC) 30 days after 1) the Final Decision issued by the CPUC or CCA
10 Rulemaking, Phase II, or 2) the Board enacted CCA legislation which ever is later, unless
11 events warrant earlier action. The Board of Supervisors shall request the Program Director or
12 the SFPUC to report back at the various CPUC milestones, including when the final decision
13 is issued by the CPUC.
